Labor Market Information Review

Indiana Labor Market TRENDS

A Quarterly Release Containing A Selection of Current Analyses of Employment and Related Economic Factors

Contents • 2nd Quarter

- Second Quarter 1982 Seasonally Adjusted Indiana Nonagricultural Employment
- Selected 1980 Data for Indiana Counties
- Indiana's Occupational Projections, 1978-1985
- Size Distribution of Indiana Firms Studied

  Indiana Covered Employment by Industry Group and Reporting Unit Size
- Two Additional Labor Surplus Areas
- Statistical Tables
  - I. Consumer Price Indexes
  - II. Annual Average Unemployment Rates
  - III. Indiana Labor Force Summary
  - IV. Indiana Wage and Salaried Employment
  - V. Indiana Average Weekly Earnings
  - VI. Labor Force Summary for Major Indiana Labor Market Areas (SMSAs)
  - VII. Wage and Salaried Employment in Major Indiana Labor Market Areas (SMSAs)
  - VIII. Summary of Unemployment Insurance Activities
  - IX. Unemployment Insurance Payments by Local Office
  - X. Unemployment Insurance Payments by Industry

  Covered Employment and Payrolls

The unrevised Consumer Price Index (previously Table II) and the Labor Turnover in Manufacturing series have been discontinued.

SECOND QUARTER 1982 SEASONALLY ADJUSTED

INDIANA NONAGRICULTURAL EMPLOYMENT

Statewide nonagricultural establishment employment, seasonally adjusted, decreased significantly for the fifth consecutive quarter. The decline between quarters was over two per cent while the drop between years was well above four per cent. When comparing the current quarter with the comparable quarter in 1979, the downfall has ballooned to 229,000 or roughly ten per cent.

Manufacturing employment fell both over the quarter and year with most of the loss occurring in durable goods. Over the quarter, on a positive note, employment increased in auto and parts, equipment for autos, and mobile homes and recreational vehicles. Also, nondurable goods recorded an overall gain between quarters led by the rubber and plastics and food industries. Over the year, only two sub-industries, recreational vehicles and drugs and medicines posted positive improvement.

In nonmanufacturing, employment decreased about the same in each time frame. Over the quarter, large losses occurred in trade, construction, government, and services as typical seasonal advancements in these industry divisions failed to take place. Much of the same negative growth occurred over the year, with the exception of the services division and utilities industry. Faced by dwindling revenue and inflated costs, the government division was the largest loser over the year, followed closely by trade and construction.

SEASONALLY ADJUSTED

INDIANA NONAGRICULTURAL EMPLOYMENT

Average for State -

* Note Published to Avo
Disclosure of Individ
Firm Data.

Covered Employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

Indiana's Occupational Projections, 1978 - 1985

by Martin Heller and Irwin Cohen

104,800 Job Openings Annually from 1978 to 1985

During the past several months, the occupational projections from 1978 to 1985 for the State and its 14 regions have been published. This article presents a summary of the occupational job needs, employment changes and relative occupational distributions for the State and its 14 regions.

The principal results are the average annual job needs which occur because of industry expansion (or contraction) and replacements due to separations from the work force. These are displayed in Chart 1 and Table 1.[1]

For the State, about 104,800 job openings per year are expected. From 1978 to 1985, openings are projected to grow about 11 per cent. Regions containing the largest metropolitan areas are expected to have the largest number of job openings. These are Region 8 - 26,500, Region 1 - 13,500, Region 3 - 12,900 and Region 13 - 9,200.

Statewide, it is expected that the largest number of average annual job openings will occur among clerical workers (20,100), service workers (19,500) and operatives (16,900). Following these are craftsmen and kindred workers (12,800) and professional, technical and kindred (11,700).

It can be seen from Table 1 that individual regions may vary from this sequence of occupational job needs.

The simplest way to describe the method by which the projections were obtained is as follows:

1. Industry employment in 380 industries was projected from 1978 to 1985 for each region using an export base industry model and incorporating national industry projected growth.
2. Each industry has an occupational staffing pattern which was obtained from the Occupational Employment Statistics (OES) surveys of the State's employers. These patterns were transformed into per cent distributions.

---

[1] Projected job needs for detailed occupations can be found in our projections publications for the State and the regions.

3. The 1978 and the 1985 employment in each industry were multiplied by the staffing pattern for that industry. Each occupation was then added across all industries to obtain the 1978 estimates and 1985 projections for that occupation in a region. The regional estimates were added together to obtain a State estimate and projection for an occupation.*

The State and regional projections differ from the national projections primarily for three reasons:

1. The mix of industries in the State or region differs from the industry mix in the Nation as indicated by the following table. Noteworthy are the manufacturing, services, and government industry divisions. This means that the State's shares of fast- and slow-growing industries are not the same as the Nation's.

Table 2: Per Cent Distribution by Industry Of State and National Employment

	1978 State Per Cent Dist.	1978 National Per Cent Dist.
Total, All Industries	100.0**	100.0**
Mining	0.4	0.9
Construction	4.7	4.9
Manufacturing	34.3	23.2
Trans.-Comm.-Util.	5.7	5.6
Trade	22.3	22.6
Fin.-Ins.-Real Est.	4.5	5.5
Services	22.4	27.2
Government	5.7	9.4

**Column sums may not add to totals due to rounding.

2. The State's projected industry growth rates differ from the national growth rates because of the State's changing shares of the Nation's industry employment.

---

* A detailed methodology statement can be found in our State and regional projections publications.

3. The occupational staffing patterns were held constant from 1978 to 1985 in the State while national staffing patterns were adjusted for prospective changes. The projected changes in the staffing patterns were not available to us at the time that the State's projections were computed. It is expected that they will be available for the next set of projections.

The 1978 and 1985 projected occupational employment in the State and the 14 regions is displayed in Chart 2 and Table 3. Statewide employment in the various occupations is expected to increase about 11 per cent, from 2,162,000 to 2,409,000. In the regions, employment is expected to increase from the largest growth of 16 per cent in Region 11 to the smallest growth of three per cent in Region 5.

Table 4 presents a comparison of the percent distribution of 1978 occupational employment and a per cent distribution of the average annual job needs, between 1978 and 1985. This comparison indicates how the prospective job needs mix differs from the current (1978) occupational distribution.

For instance, at the statewide level, where one in seven people were service workers in 1978, one in five job openings between 1978 and 1985 will occur in this group. Similarly, where one in five people were operatives in 1978, only one in six job openings will occur in this group. Regionally, these will differ.

The State and regional publications, entitled Indiana's Occupational Projections, 1978-1985, can be obtained by writing the Occupational Information Unit, Research and Statistics, Indiana Employment Security Division, 10 North Senate Avenue, Indianapolis, Indiana 46204.

SIZE DISTRIBUTION OF INDIANA FIRMS STUDIED

Interest in the distribution of the state's employment by establishment size has heightened recently as the recession lingers and plant closings proliferate. Both state and local government officials have charged that too much of Indiana's employment is concentrated at large, aging factories, involved in the production of steel, auto parts, and household appliances rather than at smaller companies which can respond more quickly and innovatively to changing economic conditions.

Furthermore, widely-publicized national research has identified small firms (20 or fewer workers) as the source for the creation of twice as many new jobs as all other sized firms combined. In light of these developments, just how dominant are the state's big employers in providing jobs for Hoosiers?

Tables A-D on the pages immediately following this brief narration present the industry distribution of the state's covered employment 1/ by reporting unit, or establishment, size as well as the total number of establishments by employment size. 2/ The data are from March 1981, the latest data available, and two of the more pertinent findings are discussed below.

A Weighty Few Only 400 of the more than 100,000 reporting units were large establishments (i.e. employed 500 or more workers). This was less than one per cent of all economic reporting units in the state. On the other hand, 94 per cent of the reporting units employed fewer than 50 workers, indicating that there were already plenty of small firms present in Indiana. When it came to the share of employment

---

1/ Covered Employment represents about 96 per cent of nonfarm payroll employment and 89 per cent of all employment in Indiana.

2/ In most cases, an "economic reporting unit" is synonymous with the term "establishment." On occasion, two or more establishments are combined to make up one reporting unit when establishments owned by a single employer are engaged in the same economic activity in the same geographical area (e.g. grocery and restaurant chains).

enjoyed by both small and large firms, however, the large establishments showed their muscle. Although few in number, these mighty 440 provided nearly 650,000 jobs in March 1981, roughly one-third of the state's total covered employment.

Manufacturing Does It Bigger Unfortunately, 162 of the large reporting units, or more than one in three, were involved in durable goods manufacturing, precisely the sector of the state's economy hit hardest by the downturn of the past three years. Overall, 52 per cent of Indiana's manufacturing jobs were at firms employing at least 500 workers compared to only 22 per cent of the nonmanufacturing jobs. The large nonmanufacturing establishments tended to be governmental reporting units like public school districts - and these, too, have been subject to contraction recently.

A comparative summary of the employment losses suffered by both large and small establishments from 1979 to March 1981 is displayed in the following table. The results would seem to indicate that while employment at small companies nearly held its own during the first two years of the economic slump, such was not the case with the state's larger establishments.

Indiana Covered Employment by Reporting Unit Size

Unit Size	March 1981	March 1979	Numeric Change	Per Cent Change

500 +	647,275	709,345	- 62,070	- 8.8
TOTAL	2,019,259	2,127,383	-108,124	- 5.1%

Citing evidence like the table above, state officials have become firm believers in the idea that small business does it better when it comes to the creation and retention of jobs. Thus, the State of Indiana has enacted legislation creating both a Small Business Development Corporation and a Corporation for Innovation Development in order to give assistance to and provide seed money for small, innovative firms that might otherwise wither and die on the vine for lack of capital and management expertise.

Source: Quarterly Report of Employment, Wages, and Contributions required from all employers covered by the Indiana Employment Security Act. Covered employment represents about 96 per cent of nonfarm wage and salaried employment and 89 per cent of all employment. In most cases, an economic "reporting unit" is synonymous with the term "establishment." On occasion, two or more establishments are combined to make up one reporting unit when establishments owned by a single employer are engaged in the same economic activity in the same geographical area (e.g. grocery and restaurant chains).

On occasion, two or more establishments are combined to make up one reporting unit when establishments owned by a single employer are engaged in the same economic activity in the same geographical area (e.g. grocery and restaurant chains).

Two Additional Labor Surplus Areas Eligible for Federal Procurement Preference Announced

Two additional areas have been announced by the U.S. Department of Labor as eligible labor surplus areas.

Balance of Allen County (County less Fort Wayne City) and Balance of St. Joseph County (County less South Bend City) have been classified as Labor Surplus Areas, effective August 1, 1982.

This means all of Allen and St. Joseph counties are designated as LSAs. The two new areas were classified using an "exceptional circumstances" clause in the regulations.

Through May 31, 1983, employers located in these high unemployment areas shown in the following page are eligible for preference in bidding on certain Federal procurement contracts.

The reference period used in making these annual classifications is the average of the area's unemployment rate for the previous two calendar years. The reference period used for the current listing is January 1980 through December 1981. In order to be included on the annual listing of labor surplus areas, an area must have an unemployment rate 1.20 times the national average unemployment rate for this reference period. Because the national average unemployment rate during the January 1980 through December 1981 period was 7.5 per cent, the qualifying unemployment rate used in classifying labor surplus areas for the current listing in 9.0 per cent.

Areas can also be classified as labor surplus areas on the basis of exceptional circumstances. Under this procedure, State Employment Security agencies may petition for classification of areas where a sudden unforseen rise in unemployment has occurred.

Getting Contract Lists -- For a firm to receive a listing of contracts which may be bid upon, and to have that firm listed as one which would bid on such contracts, check with:

Mr. Dale Schroder (317 269 6558)
Small Business Administration
575 N. Pennsylvania Street
Indianapolis, IN 46209

How to Bid -- A firm may request a PASS Application from Mr. Schroder. This application will enable the firm to be placed on a computer listing of firms eligible to bid on government contracts.

It is not necessary for a firm's eligibility to be certified for LSA contract preference. At the time a firm bids on a contract, it will indicate on the bid form if it is located in a LSA or not.

For more information, call the manager of the local Indiana Employment Security office near you, or the Research and Statistics Section in Indianapolis at 317 232 7708.

Covered Employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general, includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

Covered employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general, includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

THIRD QUARTER 1982 SEASONALLY ADJUSTED

INDIANA NONAGRICULTURAL EMPLOYMENT

Statewide nonagricultural establishment employment, seasonally adjusted, fell moderately for the sixth consecutive quarter. The decline between quarters was one per cent while the drop between years was five per cent. When comparing the current quarter with the comparable quarter in 1979, the downfall has grown to 237,000 which represented a decline of eleven per cent.

Manufacturing employment decreased both over the quarter and year with most of the loss occurring in durable goods. Most published industries recorded minuses in both time frames. In durable goods, only the stone-clay-glass industry showed an over the quarter gain while only recreational vehicles recorded an over the year rise. In non-durable goods, the largest increase occurred over the year in the recessionary resistant drugs and medicines industry.

The last quarterly increase in manufacturing took place in the second quarter of 1981. The last yearly upward movement in manufacturing occurred in 1978.

Nonmanufacturing employment followed the negative quarterly and yearly pattern of manufacturing. On a positive note, over the quarter, contract construction revealed a slight improvement. Over the year, the services division continued to exhibit economic growth. Government employment again led all industry divisions that lost personnel both between the quarter and year.

The last quarterly increase in nonmanufacturing occurred in the fourth quarter of 1981 while the last yearly positive movement took place in 1979.

FOURTH QUARTER 1982 SEASONALLY ADJUSTED

INDIANA NONAGRICULTURAL EMPLOYMENT

Statewide nonagricultural establishment employment, seasonally adjusted, fell moderately between third and fourth quarters 1982 and plummeted drastically between fourth quarter 1981 and fourth quarter 1982. The decline between quarters was over one per cent while between years the decrease was over five per cent. More significantly, when comparing fourth quarter 1982 with fourth quarter 1978, the loss in employment amounted to 267,000 which represented almost twelve per cent of the 1978 number.

Manufacturing employment slumped both over the quarter and year as the recessionary trend continued through 1982. Ninety per cent of the losses in both time frames was concentrated in the durable goods sector. The metals, machinery, and transportation equipment industries in particular were hard hit. In the nondurable goods sector, over the quarter, the rubber and plastics products industry suffered the most, while, over the year, sizable drops occurred in the aforementioned industry along with apparel and textiles, paper, and printing.

Nonmanufacturing employment increased over the quarter but decreased over the year. The over the quarter gain resulted from the large rise in government employment which took place primarily because of the small amount of summer youth employment that occurred in the third quarter. The bulk of the yearly loss was centered around the total trade division. The services division continued to exhibit significant growth.

1982 INDIANA NONAGRICULTURAL EMPLOYMENT

SEASONALLY ADJUSTED

The seasonally adjusted statewide nonagricultural establishment employment decreased in successive quarters throughout 1982 which resulted in an annual loss of 109,800. Manufacturing and nonmanufacturing totals followed the same pattern except for an increase between the third and fourth quarters in nonmanufacturing.

Manufacturing employment recorded a year ending loss of 84,600 with 78,000 occurring in durable goods. The metals, machinery, and transportation equipment industries were the largest losers. In nondurable goods, significant downfalls took place in the apparel and textiles, paper, printing, and rubber and plastics products industries.

Nonmanufacturing employment was reduced by 25,200 in 1982. The largest decline was concentrated in the total trade division which lost 17,800 employment. Other significant setbacks happened in the construction, transportation, and government industry divisions. Service industries continued to gain employment throughout the year and finished with an 11,600 increase.

COMPUTERIZATION OF WAGE SURVEYS EXPANDS PROGRAM; OFFERS FLEXIBILITY

The automation of the Occupational Wage Survey program marks a major advance in expanding Research and Statistics' capability for providing a more comprehensive volume of wage information. The higher efficiency of the Wang computer-based system enables the survey staff to produce a greater number of surveys and introduces the capability to respond quickly to special requests for customized presentations of survey data. It also holds much potential for expanded use in providing economic development information as well.

More Survey Flexibility

While in the past, only standard survey area results were produced because of time and staff limitations, the automated system has the speed and flexibility to produce a greater variety of surveys and survey results.

One example took place a few weeks ago. An urgent request for an Occupational Wage Survey brought prompt action for a northern Indiana Chamber of Commerce.

Not only did the Chamber get a computer print-out of a not-yet-published survey in about four days, it also received two special runs breaking out large and small firms.

Further development of the automated data system will open the way for the production of a wide variety of wage publications without increasing staff size.

Many Types of Wage Surveys

Indicative of the computerized system's flexibility are the following examples of the four basic ways that survey data may be assembled, within the limitations of the data base.

(a) Geographical survey areas, or by combining areas. For example, two areas such as Lake and Porter Counties can be easily combined.

(b) A subarea may be selected out of an area survey. For example, Gary may be selected out of a Lake County survey.

(c) Survey data may be selected by industry. For example, a survey of firms in Standard Industrial Classifications (SIC) 33, primary metals, and 34, fabricated metals may be combined.

(d) Firm size may be selected. A survey of firms larger or smaller than any desired employment size level may be selected. For example, a survey of firms employing less than 200 employees is possible.

Since any combination of these characteristics may be chosen for a survey, this computerized system allows thousands of different combinations to be selected. However, confidentiality of individual employer responses may prohibit the distribution of some selections.

New Areas to be Surveyed

Since the computerized program has become operational, it is now possible to survey geographical areas previously omitted. Four major additional areas (for which numerous data requests are received) are scheduled for survey in 1983. They include Indianapolis, South Bend, Anderson and New Castle.

Following is the 1983 schedule for wage surveys, including the new areas to be surveyed.

January	Adams County Warsaw (Kosciusko County) Whitley County Kokomo (Howard County)
February	Connersville (Fayette County) Greenfield (Hancock County) Lebanon (Boone County) Jasper County
March	Crawfordsville (Montgomery County) Frankfort (Clinton County) Gary-Hammond-East Chicago (Lake County) Noble County
April	Plymouth (Marshall County) Randolph County Seymour (Jackson County)
May	Lawrenceburg (Dearborn County) Madison (Jefferson County) Marion (Grant County) Shelbyville (Shelby County)
June	Goshen (Urban Area) Huntington (Huntington County) Wabash (Wabash County) Jay County
July	Indianapolis (Marion County) South Bend (St. Joseph County) Anderson (Madison County) New Castle (Henry County)
August	Dubois County Jeffersonville (Clark County) New Albany (Floyd County)
September	DeKalb County LaPorte County (Except Michigan City) Michigan City (Urban Area) Perry County
October	Morgan County Salem (Washington County)

For information on the specific capabilities of the automated system, call (317) 232 7186.

Indiana 3rd Most Affected State

During 1980-81 Business Cycle

Michigan, Alaska and Indiana were the states most affected by the 1980-81 national business cycle, as measured by state nonfarm wages and salaries, according to the Bureau of Economic Analysis.

In the Great Lakes region, Indiana, Michigan and Ohio were strongly affected because the cyclically sensitive motor vehicle and primary metals industries accounted for large shares of nonfarm payrolls in these states.

The 1980-81 national business cycle consisted of a recession in the first two quarters of 1980 followed by an expansion until the third quarter of 1981, which was the last quarter of the three quarter plateau in real GNP preceding the sharp fourth quarter decline.

Nonfarm payrolls increased 10.1 per cent (at an average annual rate) in the expansion and 1.6 per cent in the recession. The difference between the expansion and recession rates of change (8.5 percentage points) is called the "cyclical swing;" it measures the sensitivity of nonfarm payrolls to the national business cycle.

Cyclical Swing in Nonfarm Payrolls in Great Lakes States,

1980: 1st Quarter - 1981: 3rd Quarter

	Ave. Qtrly. Per Cent Changes -- Ann. Rate			
	Expansion	Recession	Cyclical Swing	Rank in U.S.
Michigan	12.2	- 20.0	32.2	1
Indiana	9.8	- 11.2	21.0	3
Ohio	10.3	- 6.0	16.3	6
Wisconsin	9.8	- 2.8	12.6	13
Illinois	9.0	9.6	- 0.6	44

Source: Bureau of Economic Analysis

Above National Average

In Indiana, for example, nonfarm payrolls increased 9.8 per cent in the expansion and declined 11.2 per cent in the recession. The cyclical swing was 21.0 percentage points -- 12.5 percentage points more than the national average.

In each Great Lakes state, except Illinois, the sensitivity of nonfarm payrolls to the 1980-81 national business cycle was more than the national average. In the Great Lakes region, the cyclical swing was 15.4 percentage points -- 6.9 percentage points more than the national average and the largest cyclical swing among the eight BEA regions.

In the other postwar national business cycles, the cyclical swing in nonfarm payrolls in the Great Lakes region also was the largest in the Nation, and the swing in each Great Lakes State exceeded the national average.

Illinois Less Affected

The 1980-81 cyclical swing in total nonfarm payrolls ranged from 32.2 percentage points in Michigan -- 23.7 percentage points more than the national average -- to a negative cyclical swing (that is, the rate of change was larger in the recession than in the expansion) of 0.6 percentage point in Illinois -- 9.1 percentage points less than the national average. Among all States, Michigan ranked first in cyclical swing, Indiana third and Illinois 44th.

Durable Goods Most Sensitive

Among the industrial components of U.S. nonfarm payrolls, durables manufacturing and construction were the most cyclically sensitive industries, and government and the

Cyclical Swing in Nonfarm Payrolls by Industry

1980: 1st Quarter - 1981: 3rd Quarter (In Per Cent)

	Total	Dur. Mfg.	Non-Dur. Mfg.	Const.	Mining	Pri. Serv. Type	Gov.
Michigan	32.2	63.4	24.5	66.6	26.1	15.5	0.5
Indiana	21.0	45.5	- 7.8	46.7	32.9	10.2	0.7
Ohio	16.3	37.8	14.9	17.5	11.4	8.3	- 0.6
Wisconsin	12.6	34.2	10.1	38.3	53.0	7.0	-19.3
Illinois	- 0.6	- 1.5	9.0	-18.2	9.6	- 1.1	3.1

Source: Bureau of Economic Analysis

private service-type group were the least sensitive. Accordingly, the relatively large cyclical swing in total nonfarm payrolls in the Great Lakes region was due mainly to durables manufacturing. The swing in durables was larger than in any other region.

Within durables, the iron and steel, and motor vehicles industries accounted for large per cents of durables payrolls in the Great Lakes region and were among the most cyclically sensitive industries nationally. Large swings in payrolls for construction, nondurables manufacturing, and the transportation-communications-utilities group also contributed to the region's large overall swing.

NOTE: Nonfarm wages and salaries are used instead of nonfarm employment because payroll estimates use (1) the same procedures for all regions and States for the whole postwar period, (2) they reflect changes in hours worked which are highly sensitive to business cycles; and (3) changes in payrolls more directly affect government revenues and expenditures.

TABLE VIII. SUMMARY OF UNEMPLOYMENT INSURANCE ACTIVITIES

Third Quarter 1982

State Unemployment Insurance

	3rd Q. 1982	2nd Q. 1982	3rd Q. 1981	Year-to-date 3rd Q. 1982
New claims	105,350	89,600	90,100	326,650
Additional claims	82,650	70,300	53,200	229,200
Continued weeks claimed	1,061,600	1,161,400	638,100	3,652,200
Average claims per week	95,000	101,600	59,200	326,000
Total claims from other states	44,050	44,200	34,400	141,550
Number of claims exhausted	29,400	34,400	16,300	92,150
Number of first payments	61,150	58,100	47,500	224,450
Av. wkly. payment for total unempl.	$93.80	$93.50	$89.50	$93.10
Number of payments	918,200	1,033,400	516,400	3,200,000
Amount of payments	$84,310,100	$95,465,500	$46,703,500	$294,796,000
Benefits not charged to employer accounts	$ 1,148,900	$ 1,776,300	$ 790,100	$ 5,143,800
Per cent of all payments	1.4%	1.9%	1.7%	1.7%

Federal Programs (UCFE, UCX)

	3rd Q. 1982	2nd Q. 1982	3rd Q. 1981	Year-to-date 3rd Q. 1982
Initial claims	1,220	1,320	2,300	4,330
Continued weeks claimed	8,410	13,900	16,900	42,010
Number of payments	7,400	12,500	14,600	37,950
Amount of payments	$767,300	$1,293,600	$1,445,900	$3,923,800

Extended Benefit Program

	3rd Q. 1982	2nd Q. 1982	3rd Q. 1981	Year-to-date 3rd Q. 1982
New claims	6,600	35,100	200	83,230
Continued weeks claimed	72,350	278,750	1,700	528,950
Number of payments	79,550	280,550	1,300	522,400
Amount of payments[@]	$7,045,600	$24,703,650	$217,600	$45,964,750

Federal Supplemental Compensation*

	3rd Q. 1982	2nd Q. 1982	3rd Q. 1981	Year-to-date 3rd Q. 1982
New claims	40,900			40,900
Continued weeks claimed	56,400			56,400
Number of payments	32,900			32,900
Amount of payments	$3,094,600			$3,094,600

* Federal Supplemental Compensation was initiated in September, 1982 so no claims or payments were made prior to that date.

@ Includes reimbursements to other states.

TABLE VIII. SUMMARY OF UNEMPLOYMENT INSURANCE ACTIVITIES

Fourth Quarter 1982

State Unemployment Insurance

	4th Q. 1982	3rd Q. 1982	4th Q. 1981	Year-to-date 4th Q. 1982
New claims	142,800	105,350	142,200	469,450
Additional claims	104,200	82,650	94,200	333,400
Continued weeks claimed	1,282,600	1,061,600	938,100	4,934,800
Average claims per week	116,100	95,000	88,500	110,500
Total claims from other states	50,400	44,050	43,700	191,950
Number of claims exhausted	30,600	29,400	15,900	122,750
Number of first payments	82,900	61,150	81,000	307,350
Av. wkly. payment for total unempl.	$95.90	$93.80	$92.40	$93.80
Number of payments	1,107,800	918,200	758,800	4,307,800
Amount of payments	$104,439,700	$84,310,100	$69,222,400	$399,235,700
Benefits not charged to employer accounts	$ 1,028,700	$ 1,148,900	$ 1,112,400	$ 6,172,500
Per cent of all payments	1.0%	1.4%	1.6%	1.5%

Federal Programs (UCFE, UCX)

	4th Q. 1982	3rd Q. 1982	4th Q. 1981	Year-to-date 4th Q. 1982
Initial claims	2,160	1,220	2,300	6,490
Continued weeks claimed	8,430	8,410	21,200	50,440
Number of payments	5,970	7,400	17,400	43,920
Amount of payments	$654,300	$767,300	$1,771,900	$4,578,100

Extended Benefit Program *

	4th Q. 1982	3rd Q. 1982	4th Q. 1981	Year-to-date 4th Q. 1982
New claims		6,600	30	83,230
Continued weeks claimed		72,350	160	528,950
Number of payments		79,550	240	522,400
Amount of payments@		$7,045,600	$104,300	$45,964,750

Federal Supplemental Compensation **

	4th Q. 1982	3rd Q. 1982	4th Q. 1981	Year-to-date 4th Q. 1982
New claims	43,300	40,900		84,200
Continued weeks claimed	444,800	56,400		501,200
Number of payments	443,400	32,900		476,300
Amount of payments	$40,406,300	$3,094,600		$43,500,900

* Extended Benefit program not "triggered on" for any part of Fourth Quarter 1982.

** Federal Supplemental Compensation was initiated in September, 1982, so no claims or payments were made prior to that date.

@ Includes reimbursements to other states.

*Not published to avoid disclosure of individual firm data.

Covered Employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general, includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

*Not published to avoid disclosure of individual firm data.

Covered Employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general, includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

*Not published to avoid disclosure of individual firm data.

Covered Employment includes employees working for firms subject to the Indiana Employment Seevrity Act. The Act, in general, includes employers with one or more employees. Excluwed are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

FIRST QUARTER 1983 SEASONALLY ADJUSTED

INDIANA NONAGRICULTURAL EMPLOYMENT

Statewide nonagricultural establishment employment, seasonally adjusted, increased modestly during the first quarter of 1983. The last quarterly gain took place exactly two years ago in the same time frame; i.e., between the end of 1980 and the start of 1981. Also, the current quarterly advance was only the second recorded in the last four years. However, when placing the good news in proper perspective with a comparison to the first quarters of 1979 and 1983 we see an employment deficit of 261,100 jobs. Employment gains have yet a long way to go to reach the previous peak.

Manufacturing employment inched upward over the quarter in the durable goods sector while total nondurable goods remained unchanged. Over the year, however, manufacturing and its two major sectors suffered setbacks with most of the drop occurring in durable goods. The largest quarterly gain was registered by the auto and parts industry; whereas, the largest yearly loss was recorded in primary metals.

Nonmanufacturing employment increased over the quarter but decreased over the year. The quarterly rise resulted from gains recorded in the service, construction, and finance divisions which also saw yearly hikes in employment levels. However, both wholesale and retail trade recorded yearly losses in employment levels.

SEASONALLY ADJUSTED

INDIANA NONAGRICULTURAL EMPLOYMENT

NONAGRICULTURAL Establishment Related Employment	IQ 83 (Thousands)	IV Q 82 (Thousands)	I Q 82 (Thousands)	CHANGE FROM

NEW AREA AND TITLE DEFINITIONS

ANNOUNCED FOR INDIANA SMSAs

Several changes in the definitions or titles of most of Indiana's metropolitan statistical areas have been announced by the Office of Management and Budget.

The new designations follow a complete review of all metropolitan area definitions, utilizing commuting and other statistics from the 1980 Census, and new standards for defining metropolitan statistical areas.

Areas Renamed

One change that has been announced is that the term, "standard metropolitan statistical area" (SMSA) will be replaced by a shorter designation, "metropolitan statistical area" (MSA).

Final revised designations will be published in June 1983 and go into effect June 30, 1983.

Under the new standards, an area qualifies for designation as an MSA in one of two ways: It must include a city of at least 50,000 population, or an urbanized area of at least 50,000 with a total metropolitan population of at least 100,000.

Comprised of Counties

In addition to the county containing the main city, an MSA may also include additional counties which have close economic and social ties to the central county. MSAs are defined in terms of entire counties, except in the six New England States, which use town area definitions.

Follows Decennial Census

A comprehensive review and revision of metropolitan area definitions is undertaken every 10 years following completion of each decennial Census. Prior to the current 1983 announcements, no changes in definitions had been made since June 1981.

Standard metropolitan definitions were first developed and issued about 30 years ago. Their major purpose is to enable Federal statistical agencies to use the same geographic definitions in the study of metropolitan characteristics. Changes, which have been announced for Indiana areas, follow:

Metropolitan Statistical Areas Whose Definitions or Titles Are Being Changed

Effective June 30, 1983	Definition
ELKHART-GOSHEN, IN (Former title: Elkhart, IN) Central cities: Elkhart, IN; Goshen, IN	Elkhart County
EVANSVILLE, IN-KY	Posey County Vanderburgh County Warrick County Henderson County, KY (Gibson County, IN deleted)
FORT WAYNE, IN	Allen County DeKalb County Whitley County (added) (Adams and Wells Counties deleted)
LAFAYETTE, IN (Former title: Lafayette-West Lafayette, IN)	Tippecanoe County
SOUTH BEND-MISHAWAKA, IN Central cities: South Bend, IN; Mishawaka, IN	St. Joseph County (Marshall County deleted)

NEW ALBANY, IN AREA	Clark County Floyd County Harrison County (added)
(This area is included in the Louisville, KY-IN MSA, which also includes:	Bullitt County, KY Jefferson County, KY Oldham County, KY Shelby County, KY (added)
TERRE HAUTE, IN	Clay County Vigo County (Sullivan and Vermillion Counties deleted)

Metropolitan Statistical Areas with No Change in Definitions or Titles

ANDERSON, IN	Madison County
BLOOMINGTON, IN	Monroe County
INDIANAPOLIS, IN	Boone County Hamilton County Hancock County Hendricks County Johnson County Marion County Morgan County Shelby County
KOKOMO, IN	Howard County Tipton County
MUNCIE, IN	Delaware County

Title or Definition Changes For these Areas To Be Announced

GARY-HAMMOND-EAST CHICAGO, IN	Lake County Porter County

(Geographical definition expected to remain unchanged.)

SELECTED 1981 DATA FOR INDIANA COUNTIES

Data are derived from reports pertaining to firms covered by the Indiana Employment Security Act (Covered Employment).

County Map	Description

Average for State - $404

* Not published to Avoid Disclosure of Individual Firm Data.

Average weekly earnings are computed from the quarterly earnings and average employment of all manufacturing establishments covered by the Act. The figures were computed from total payrolls so they include all employees -- janitors, company officers, factory workers, office employee -- instead of only production workers.

Average for State - $300

* Not published to Avoid Disclosure of Individual Firm Data.

Covered Employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general, includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

New York	289.6	283.5
Chicago	291.4	293.7
Cincinnati	307.6	307.6
St. Louis	293.2	293.2
Los Angeles	289.6	287.1

No Consumer Price Index (CPI) is produced by the Bureau of Labor Statistics for Indiana, or any Indiana cities. CPI series for several cities are published, including the ones listed here.

+ Seasonally adjusted per cent change.

* CPI-U Series, beginning January 1983 changed the way home owner costs are measured to rental equivalence - based on implicit rent owners would have to pay to rent homes they own.

CPI HISTORICAL SERIES

Labor force data are based on place of residence and include all types of Employment; non-agricultural wage and salaried, self-employed, domestics and farm workers.

Does not add due to rounding. (P - Preliminary)
Monthly estimates for the State and SMSAs are adjusted to new benchmark data at the end of each year. * The 1980 data series presented above will be superseded by a revised series to be published in the next issue.

TABLE IV: NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT IN INDIANA ESTABLISHMENTS, BY INDUSTRY (in thousands).

1983 DATA BY MONTH

INDUSTRY	JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC
Total Wage and Salary Employment	1941.6	1944.2	1952.9									
Manufacturing	543.5	547.7	549.9

TABLE VIII. SUMMARY OF UNEMPLOYMENT INSURANCE ACTIVITIES

First Quarter 1983

State Unemployment Insurance

	1st Q. 1983	4th Q. 1982	1st Q. 1982	Year-to-date 1st. Q. 1983
New claims	129,800	142,800	131,700	129,800
Additional claims	57,100	104,200	76,250	57,100
Continued weeks claimed............	1,463,500	1,282,600	1,429,200	1,463,500
Average claims per week	126,700	116,100	129,400	126,700
Total claims from other states.....	59,200	50,400	53,300	59,200
Number of claims exhausted.........	35,500	30,600	28,350	35,500
Number of first payments...........	87,300	82,900	105,200	87,300
Av. wkly. payment for total unempl.	$94.80	$95.90	$92.10	$94.80
Number of payments.................	1,291,400	1,107,800	1,248,400	1,291,400
Amount of payments.................	$119,148,800	$104,439,700	$115,020,400	$119,148,800
Benefits not charged to employer accounts..............	$ 1,406,600	$ 1,028,700	$ 2,218,600	$ 1,406,600
Per cent of all payments......	1.2%	1.0%	1.9%	1.2%

Federal Programs (UCFE, UCX)

	1st Q. 1983	4th Q. 1982	1st Q. 1982	Year-to-date 1st. Q. 1983
Initial claims.....................	1,860	2,160	1,790	1,860
Continued weeks claimed............	15,470	8,430	19,700	15,470
Number of payments.................	13,500	5,970	18,050	13,500
Amount of payments.................	$1,372,300	$654,300	$1,862,900	$1,372,300

Extended Benefits **

	1st Q. 1983	4th Q. 1982	1st Q. 1982	Year-to-date 1st. Q. 1983
New claims.........................	70,780		41,530	70,780
Continued weeks claimed............	385,500		177,850	385,500
Number of payments.................	359,770		162,300	359,770
Amount of payments*	$33,230,800		$14,215,500	$33,230,800

Federal Supplemental Compensation ***

	1st Q. 1983	4th Q. 1982	1st Q. 1982	Year-to-date 1st. Q. 1983
New claims.........................	12,760	43,300		12,760
Continued weeks claimed............	185,700	444,800		185,700
Number of payments.................	186,200	443,400		186,200
Amount of payments.................	$16,045,200	$40,406,300		$16,045,200

* Includes reimbursements to other states.

** Extended Benefit program not "triggered on" for any part of Fourth Quarter 1982.

*** Federal Supplemental Compensation was initiated in September, 1982 so no claims or payments were made prior to that date.

1/ Initial claims are notices given by those losing jobs covered by UI programs that they are starting periods of unemployment. Those claimants who continue to be unemployed for a full week or more are then counted in the insured unemployment figure.

2/ Unemployment insurance for Federal Civilian Employees. To avoid duplication, excludes claims from Federal workers with both Federal and State wage credits.

3/ Unemployment insurance for Ex-Servicemen. Excludes claims filed jointly with other programs.

4/ New Extended Benefit Period began January 31, 1982 and ended July 17, 1982.

5/ Federal Supplemental Compensation period began September 12, 1982.

Covered Employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general, includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private housholds and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

SECOND QUARTER 1983 SEASONALLY ADJUSTED

INDIANA NONAGRICULTURAL EMPLOYMENT

Statewide nonagricultural establishment employment, seasonally adjusted, decreased slightly from first quarter 1983, and also fell moderately from second quarter 1982. Furthermore, the employment deficit has grown to 272,900 from second quarter 1979 which represents a job loss of 12.1 per cent. Approximately two-thirds of the decline has occurred in manufacturing industries.

Manufacturing employment surged upward for the second consecutive quarter as both the durable and nondurable goods sectors registered gains. As a result, the number of manufacturing jobs statewide has increased 14,300 since the recession's fourth quarter 1982 trough. Despite this gain, employment remained 31,800 below its year ago level and was down 185,500 from the second quarter of 1979.

Nonmanufacturing employment experienced a second quarter setback as most industry divisions failed to grow, led principally by contract construction. Construction employment failed to increase by the average amount from the first quarter to the second quarter. This was in part due to the seasonal decline in the two previous quarters which was much less than average. Therefore, without a very strong underlying trend/cycle, the second quarter change in employment seemed anemic and below the average seasonal change.

The total loss in nonmanufacturing also overshadowed the gain in manufacturing resulting in the small decrease in total nonagricultural employment.

MARKS 50 YEARS OF SERVICE

This year marks the 50th anniversary of the nationwide public employment service system. In July 1933, Governor Paul V. McNutt established the Indiana State Employment Service at a time when the nation was hard-hit by the Great Depression. At that time it is estimated that 15 million Americans, 25 per cent of the work force, were out of work.

Federal legislation clearing the way for Indiana and the other states to form their respective public employment agencies came the previous month, on June 6, when the Wagner-Peyser Act was signed into law.

Indiana's employment service made 61,000 job placements that first year. After a half century of continuous service to Hoosiers seeking employment assistance, the employment service has made over 5 million job placements.

ISES's initial mission was to register and assist the jobless to fill openings in the public and private sectors. Lack of employment in private industry had led to a flurry of legislation creating public works and relief projects. Both federal and state agencies registered and placed the unemployed in jobs available in public projects.

One service begun by the ISES shortly after its formation was a program to collect and disseminate employment statistics. In July 1935, the ISES entered an agreement with the U.S. Bureau of Labor Statistics to participate in the start-up of such a program through its Research and Statistics Section. (See page illustration of Indiana Employment Review.)

A second major responsibility was given ISES when passage of the Social Security Act of 1935 led to enactment of the state unemployment compensation (UC) law on March 19, 1936. With its added task of administering the UC program, ISES underwent a name change to the Indiana Employment Security Division (IESD).

Since that time, the IESD, or Job Service as it is sometimes called, has dealt with labor shortages growing out of World War II and the Korean Conflict mobilization and surpluses caused by demobilization. The remainder of the nineteen-fifties, with the exception of two brief recessions, was basically a tight labor market.

At the same time the civilian labor force was expanding dramatically and Indiana's Job Service broadened its services to provide help for special groups including minorities, veterans, youth, handicapped, older workers and initiated programs to provide special assistance to professional applicants.

How deeply IESD is committed to providing employment services can be illustrated by the number of persons seeking assistance at Job Service local offices, which now number 48. Every five years the equivalent of the Indiana labor force -- some 2.5 million workers -- has registered for some type of employment service and since 1973, the state Job Service has placed 1.1 million applicants into jobs.

Effective October 1, 1983, IESD will play a key role in concert with other state agencies in carring out the provisions of the Job Training partnership Act. (JTPA). The JTPA is the first major revision to the Wagner-Peyser Act and it builds on the framework of more than 2,000 free public employment service offices in all the states and territories.

Under JTPA there will be a new emphasis on training the economically disadvantaged and retraining the "dislocated" worker whose job and skills have been eliminated by changes in technology and foreign competition.

Unemployment insurance will continue to be administered by IESD, as it has been since it was instituted in the state in 1936. From 1938, when benefits to the jobless covered by the Indiana Employment Security Act were first paid, through 1982, the total of unemployment compensation going to claimants has totaled over $3 billion.

Vol. II JULY, 1935 Number VII

ISES TO COLLECT INDIANA EMPLOYMENT STATISTICS FOR BUREAU OF LABOR STATISTICS

The Indiana State Employment Service has recently entered into an agreement with the Bureau of Labor Statistics, United States Department of Labor, to collect employment and payroll information each month from manufacturing and non-manufacturing establishments in Indiana. The agreement has been approved and signed by Miss Perkins, Secretary of Labor, and Paul V. McNutt, Governor of Indiana, and will be operative after July 15, 1935. At the present time 2,681 Indiana firms, with 166,701 employees, are reporting employment information to the Bureau of Labor Statistics. These reporting firms have been asked to make future reports through the Indiana State Employment Service.

Firms willing to cooperate in the future with this organization will correspond with our headquarters in Indianapolis. Individual reports and certain monthly tabulations will be forwarded to Washington to be included in the Bureau of Labor Statistics reports for the United States. A request will be made of firms now reporting to the Indiana State Employment Service, but not reporting to the Bureau of Labor Statistics, to include their reports with the reports forwarded to Washington.

It is the intention of the Indiana State Employment Service to publish in the Indiana Employment Review information regarding current employment trends in the non-manufacturing industries, together with the regular monthly tabulation of manufacturing employment statistics. A large majority of reports are received by the end of each month. In the past, on the first of each month, a preliminary tabulation has been made of data received during the previous month. A press release is written concerning trends of employment during the preceding month, and circulated to all newspapers in the state. The release has also been sent to all firms that cooperate with the Indiana State Employment Service in the collection of employment statistics. This procedure will be continued in the future. The addition of many new firms and the inclusion of non-manufacturing data will result in more representative information being available.

Reports of individual firms are held strictly confidential and are available only to sworn members of the Bureau of Labor Statistics and to employees of the Statistical Department, Indiana State Employment Service. The published tabulations by city and by industry will be combined in such a way that reports of individual firms will not be directly or indirectly recognized.

At the present time the Bureau of Labor Statistics collects reports from Indiana establishments in the following industrial groups: manufacturing, bituminous coal mining, public utilities, wholesale trade, retail trade, hotels, quarrying and nonmetallic mining, laundries, dyeing and cleaning, banks, brokerage, and insurance.

The inauguration of this new consolidated program is the first attempt to collect and publish adequate employment statistics for Indiana. Reports by cities will be compiled from data received from both manufacturing and non-manufacturing establishments in individual cities. The consolidation of reporting routines will result in the avoidance of some duplication in reports by individual firms. More adequate and representative employment statistics will be published for Indiana. It is felt that the results of the new program will be both interesting and helpful to employers in the state.

Per Capita Personal Income of U.S., Indiana and Indiana SMSAs, 1980-1981

Per capita personal income equals total personal income divided by total population. In this series, per capita income is computed by dividing the residence-adjusted total personal income by mid-year population estimates.

Per capita figures should be used with caution. Temporary conditions may alter data for one time period so that it is not representative of an area over a longer interval.

Average for State $313

*Not Published to Avoid Disclosure of Individual Firm Data.

Covered employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general, includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.

CPI GEOGRAPHICAL SERIES

Consumer Price Index -- June 1983

	CPI-W	CPI-U*
U.S. City Average	297.2	298.1
New York	285.9	288.1
Chicago	295.8	298.6
Cincinnati	** 309.5	** 311.3
St. Louis	** 294.0	** 295.4
Los Angeles	292.1	293.6

No Consumer Price Index (CPI) is produced by the Bureau of Labor Statistics for Indiana, or any Indiana cities. CPI series for several cities are published, including the ones listed here.

* CPI-U Series, beginning January 1983 changed the way home owner costs are measured to rental equivalence - based on implicit rent owners would have to pay to rent homes they own.

+ Seasonally adjusted per cent change.

** May data

Labor force data are based on place of residence and include all types of Employment; non-agricultural wage and salaried, self-employed, domestics and farm workers.

Does not add due to rounding. (P - Preliminary)
Monthly estimates for the State and SMSAs are adjusted to new benchmark data at the end of each year.

TABLE IV: NONAGRICULTURAL WAGE AND SALARY EMPLOYMENT IN INDIANA ESTABLISHMENTS, BY INDUSTRY (in thousands).

NOTE:

1. Employment is based on establishment reports, reflecting place of work.
2. Employees not working due to involvement in labor-management disputes are excluded.
3. Monthly estimates for the State and SMSA's are adjusted to a new benchmark at the end of each year. The 1982 and 1983 data reflect the 1982 benchmark. Revised monthly data are available upon request.

TABLE VIII. SUMMARY OF UNEMPLOYMENT INSURANCE ACTIVITIES

Second Quarter 1983

State Unemployment Insurance

	2nd Q. 1983	1st Q. 1983	2nd Q. 1982	Year-to-date 2nd Q. 1983
New claims..........................	88,200	129,800	89,600	218,000
Additional claims..................	46,400	57,100	70,300	103,500
Continued weeks claimed	961,700	1,463,500	1,161,400	2,425,200
Average claims per week	83,600	125,300	101,000	104,500
Total claims from other states	44,500	59,200	44,200	103,700
Number of claims exhausted	34,500	35,500	34,400	70,000
Number of first payments	40,800	87,300	58,100	128,100
Av. wkly. payment for total unempl.	$93.00	$94.80	$93.50	$94.10
Number of payments	848,200	1,291,400	1,033,400	2,139,600
Amount of payments	$76,612,800	$119,148,800	$95,465,500	$195,761,600
Benefits not charged to employer accounts	$ 936,500	$ 1,406,600	$ 1,776,300	$ 2,343,100
Per cent of all payments......	1.2%	1.2%	1.9%	1.2%

Federal Programs (UCFE, UCX)

	2nd Q. 1983	1st Q. 1983	2nd Q. 1982	Year-to-date 2nd Q. 1983
Initial claims	1,590	1,860	1,320	3,450
Continued weeks claimed...........	10,000	15,470	13,900	25,470
Av. number of claims per week	900	1,300	1,100	1,100
Number of payments................	8,800	13,500	12,500	22,300
Amount of payments	$ 851,100	$ 1,372,300	$ 1,293,600	$ 2,223,400

Extended Benefit Program

	2nd Q. 1983	1st Q. 1983	2nd Q. 1982	Year-to-date 2nd Q. 1983
New claims	12,950	70,780	35,100	83,730
Continued weeks claimed...........	163,700	385,500	278,750	549,200
Av. number of claims per week.....	13,600	35,100	24,300	24,300
Number of payments	173,600	359,770	280,550	533,370
Amount of payments *..............	$15,586,100	$ 33,230,800	$24,703,650	$ 48,816,900

Federal Supplemental Compensation **

	2nd Q. 1983	1st Q. 1983	2nd Q. 1982	Year-to-date 2nd Q. 1983
New claims	50,620	12,760		63,380
Continued weeks claimed	523,600	185,700		709,300
Av. number of claims per week....	44,100	15,200		29,700
Number of payments	485,500	186,200		671,700
Amount of payments	$42,698,500	$ 16,045,200		$ 58,743,700

* Includes reimbursements to other states.

** Federal Supplemental Compensation was initiated in September 1982, so no claims or payments were made prior to that date.

Covered Employment includes employees working for firms subject to the Indiana Employment Security Act. The Act, in general, includes employers with one or more employees. Excluded are railroads, small non-profit institutions and churches. Beginning with January 1, 1978, all state and local government employment, including that in schools, is covered. Accredited private and parochial school employment is also covered. However, only part of the employment in private households and on farms is included in the expanded coverage.

Average weekly earnings are computed from the quarterly earnings and average employment of all employees in establishments covered by the Act. The figures are computed from total payrolls so they include all employees--janitors, company officers, factory workers, office employees--instead of only production workers. The new coverage in 1978 affects the all covered employment average so these averages are discontinuous from those calculated for prior years.
